Anger Management Courses for Couples - 2006

The anger management course for couples is designed to transform the way we experience and view anger in relationships. The impact of anger does not need to be devastating and having mastery and choice about how anger effects us and our lives is an empowering experience. We will be inquiring into things that we cannot already see about ourselves and the dynamics in our relationship that lay hidden from view. The course content is not only applicable to anger in our closest relationships, it can also be applied to all areas of life and to all relationships.

Focus of the Course:

Getting to the source of anger

Inquiring into our view of anger and our partner's anger
